What would keep me coming back to MuseKat?

To make MuskeKat more engaging, we could add the ability for users to include follow-up questions that would match other popular AI learning tools and would help foster curiosity. Additionally, incorporating various customization options might also be helpful. (Ben)

Things that would keep me coming back to MuseKat are the ability to see what the image associated with the Learning nugget you're looking at. Having it be able to recognize characters from franchises that aren't just the most recognizable ones (i.e Pikachu and Eevee). Finally have it able to tell the same story in different ways depending on the age(Robert)

I think MuseKat would be more engaging if it had Mini games that teach to the kids, scavenger hunts for activities outside and a fact of the day. (Isabel)

I think for younger users in particular, the ability to revisit photos, stories and events might be really fun. (Leah)

For older users, the ability to ask follow up questions, do additional research, and practice social skills would be awesome (Leah)

For older users, longer, more detailed stories, told by multiple characters might help hold their interest over time (Leah)
